

Unlocking Sales Insights: **Data-Driven Performance with the Superstore** **Dashboard**

By
Balachandru S
Intern at Elevate Labs

Project Overview

Content:

Objective:

Design an interactive dashboard to support data-driven decision-making.

Tool Used:

Power BI

Dataset:

Superstore Sales & Financial Data (sourced from Kaggle)

Deliverables:

Interactive Dashboard + Executive Summary Presentation

Dashboard Design & Features

Content:

- KPI Cards:**

Total Sales, Total Orders, Total Customers, Avg Sales/Month

- Time-Series Visualization:**

Sales performance from 2015 to 2018

- Segmented Views:**

By Region, Segment, Product Category, City, and Ship Mode

- Interactivity:**

Dropdown filter to explore data dynamically

- Design Aesthetic:**

Clean layout, consistent color theme, and varied visuals (bar, line, pie, donut)

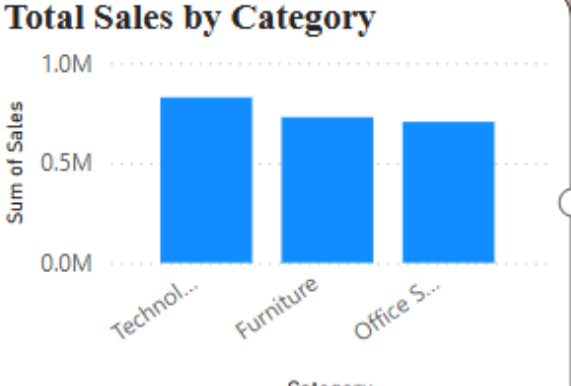

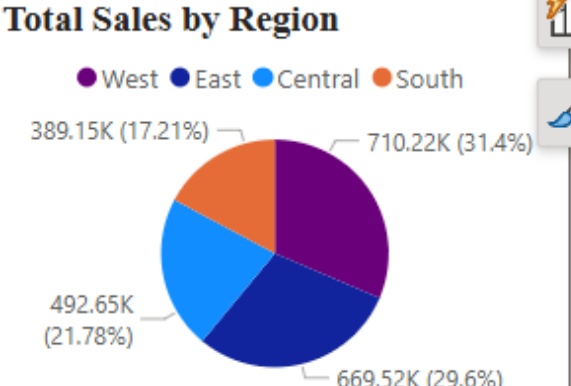

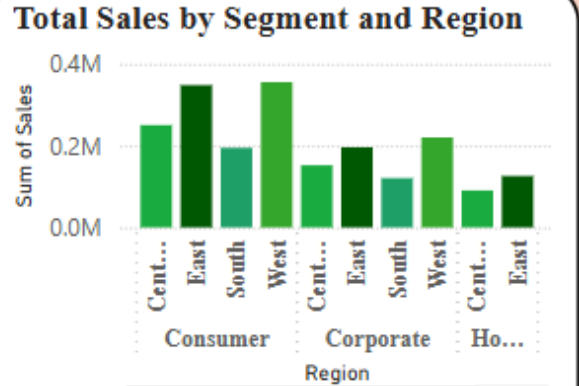

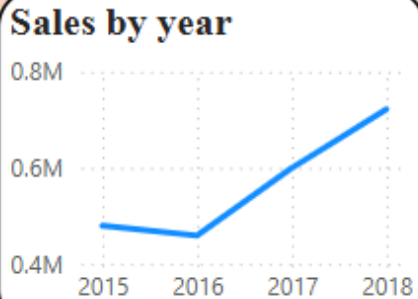

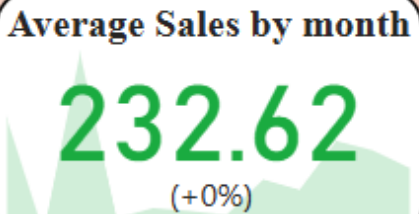

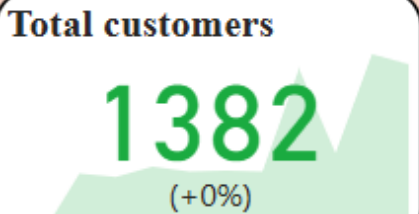

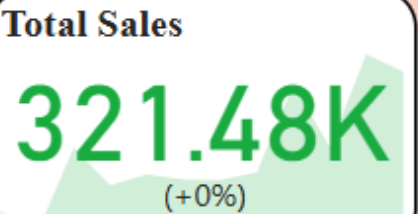

Key Business Insights

Content:

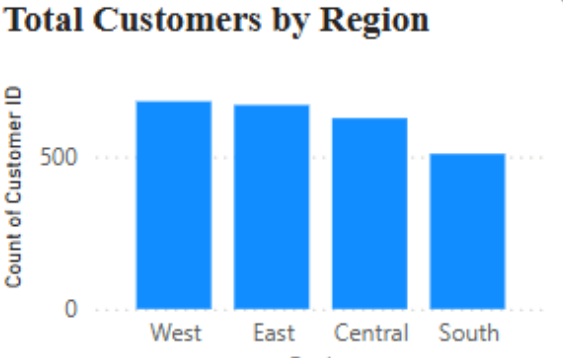

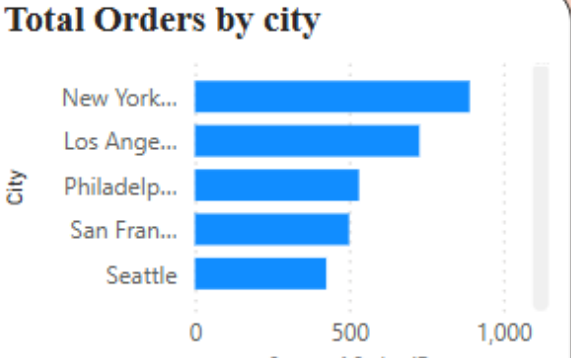

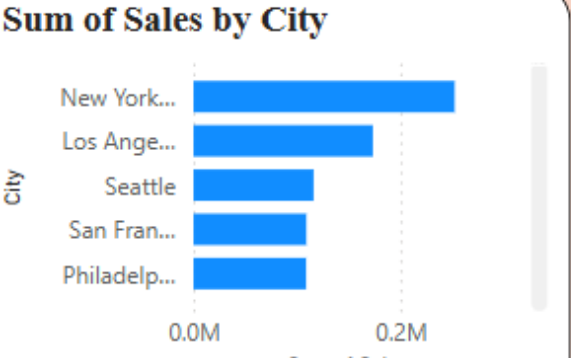

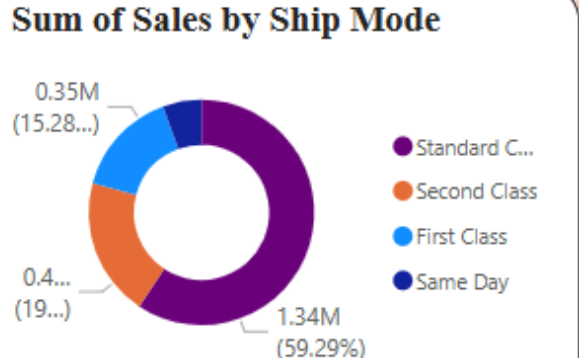

- South region generates the highest total sales (31.4%)
- Standard Class is the most used shipping method (59.29%)
- Technology & Furniture lead in product category sales
- New York has the highest number of orders and sales
- Sales have shown a steady upward trend from 2016 to 2018

Superstore Sales Performance Dashboard
